To Whom It May Concern,

Reference is made to work recently carried out on behalf of De Martin & Gasparini Pty Ltd (DMG) by Krystol Group Pty Limited (Krystol) on the projects listed below:-

- *St Vincent's Research & Biotechnology Building – A W Edwards*
- *Evolve @ Jackson's Landing – Bovis Lend Lease*
- *Kingsford Zone Substation – Energy Australia*
- *Bega Marketplace – Construction Engineering*
- *Stocklands Shopping Centre, Shellharbour – Brookfield Multiplex*
- *SACL Multistorey Carpark, Sydney International Airport - Abigroup*

DMG consider this company to be proficient and professional in the supply and installation of the waterproofing admixture "KIM" (Krystol Internal Membrane) including the waterproof treatment of all associated construction and/or expansion joints.

Over the years, both companies have established a solid working relationship. We have found their experience and pro-active approach helpful in assisting with the design and implementation of waterproofing systems that offer the best solution appropriate for individual projects.

DMG have always found this company diligent in the execution of the work as well as after sales service and maintenance of the projects in which they were involved.

I would have no hesitation in recommending, where appropriate, their products and services for any future developments.

Yours faithfully,  
**DE MARTIN & GASPARINI PTY LIMITED**
